

Boxplots showing width of confidence interval associated with projected cumulative cases from October 16 to December 31, 2020.

Projections are based on training data for India from March 15 to October 15, 2020.
Supplementary Table S1 describes parameter values used to generate these projections in detail.

Data Source: covid19india.org

Note:

– We do not include projections from the ICM model it yields only total (reported + unreported) case counts.
