**Densities (L) and scatterplot (R) of projected and observed active reported cases from October 16 to December 31, 2020.**

Projections are based on training data for India from March 15 to October 15, 2020.
Supplementary Table S1 describes parameter values used to generate these projections in detail.

Data Source: covid19india.org
Note:
– We do not include projections from the baseline and SAPHIRE models as they do not yield active case counts.
– We do not include projections from the ICM model it yields only total (reported + unreported) case counts.
