**Boxplots showing width of confidence interval associated with projected active cases from October 16 to December 31, 2020.**

Projections are based on training data for India from March 15 to October 15, 2020.
Supplementary Table S1 describes parameter values used to generate these projections in detail.

Data Source: covid19india.org
Note:
– We do not include projections from the baseline and SAPHIRE models as they do not yield active case count projections.
– We do not include projections from the ICM model it yields only total (reported + unreported) case counts.
